

# Julián Cerón

## Portfolio

Julian Ceron is an sculptor born in Colombia who creates artworks by twisting a continue steel bar making this way diferents shapes, giving life to his famous steel ants and other bugs. Abstract and human figures that reflect the way he sees the word. By combining the twisting and other techniques and materials such as stones and glass he makes wonderfull pieces like sofas, chairs, tables, lights or magazine racks. His biggest public art works can reach 5 meters of height. They are placed in cities like Blanes in Spain and Cali in Colombia and he have works in diferent art galleries in Spain and Europe. We want to give this portfolio with the aim of showing his work in your future projects and festivals. We can create under request unique and exclusive art pieces that won't be ignored. For a big dimension piece we'll need an aproximated period of months after the contract.

ANT  
IRON  
3,80 mts x 2,80 mts
